OLIVON
PODTRECK

The Olivon Podtreck
has been designed with a multiple strap system to fit as wide a range of tripods as posssible.

Versatile backpack designed to carry a tripod with camera,scope or binoculars mounted.
Featuring:
- 8 contact points for secure installation
- Large quick release accessory pouch
- Secondary zipped pocket and draw string pouch.

1

Fully extend your tripod legs and pull them apart. For ease of installation detach the accessory pouch.

2

Present the Podtreck to the top, and between two of the open tripod legs. Shoulder straps facing outwards, away from the tripod legs.

3

The first buckled strap at the top (narrow end) of the Podtreck should be fastened securely around the base of the tripod head.

4

The second buckled strap, positioned slightly lower than the first, should be fastened around the centre column of the tripod.

5

There are 3 pairs of Velcro straps at either side of the Podtreck. These should be fastened around the top section of the tripod legs.

6

Finally, adjust the shoulder and waist straps to fit the user.
